Hi Tom,

Saw your post directing communications here. I also responded to another email that may have been sent by your client to this address.

What is the case/appeal/complaint/OPR investigation status?

What is the end state/goal for your client?

I am interested in how I may be able to support your client.

I was an applicant who underwent a poly from Ripperger in May 2014 and may have had a similar experience with the same unethical/illegal behavior regarding past mental health treatment.

As for myself I don't care at this point, I have a better job elsewhere and I'd never work for Usss now. However if I could help your client I'd like to. What Ripperger did frustrates me because she is supposed to be the Paragon of integrity and then abuses her access to PII/PHI... Repeatedly... And she can also lie under oath about it and destroy evidence...

Was SA Ripperger asked under oath if she had ever made derogatory comments about any other applicant's mental health history? Or had been accused of such by another applicant? Did she deny doing so?

If there was a recording of her making said comments to me/being accused of it/proof her immediate supervisor was made aware at the time, would that help your client?
